**Webpage:** <http://everbloomstudios.com/maps/candyworld>

**Press contact:** [business@everbloomstudios.com](mailto:business@everbloomstudios.com)

**Price:** 830 Minecraft Coins

**Description:** A Nightmare in Candyworld is a new, visually stunning, action adventure, available on the Minecraft Marketplace. Featuring a cast of loveable characters and a captivating store.

In the map, the king of Candyworld has been kidnapped by the evil lord Sugar Bones. The 4 chapter story revolves around the player going through Candyworld to save king candy from Sugar Bones with the help of a magical fairy, and some friends they meet on the road to Candy Mountain!

The Minecraft Marketplace is a place where creators can publish their maps, skins, and texture packs for millions of players to download! Maps on the Marketplace can currently be played on Windows10, iOS, Android and Xbox One, soon the marketplace will also support Nintendo Switch.

The Minecraft Marketplace was launched in June 2017, and by September, creators had already earned over a million dollars in sales!

Microsoft started work on the Marketplace shortly after its acquisition of Mojang, back in 2014. The team decided on a curated selection of content in order to avoid IP issues and large numbers of suboptimal user-generated submissions. Mapmaking is extremely popular in the Minecraft community.

Microsoft hopes the new store will inspire quality additional content, such as adventure maps and innovative interactive experiences that use Minecraft almost like a game engine.

Everbloom Studios are one of the lucky few creators allowed to publish their maps on the Minecraft Marketplace. Everbloom has been around since October 2016, and some of their members have been creating amazing builds and worlds in Minecraft for over 10 years!

Visit the store and play Jurassic Depths yourself or learn more!
